Information for fields 1 – 8 are required by WPS regulations. Fields 1, 2, and 5, 6, 7 and 9-11 are USDA required fields for private applicators using restricted-use products.

The hand/head symbol 🖐 indicates the Worker Protection Standard (WPS), information (items 1- 8). This information (except time completed**)** must be posted **before** the pesticide application and remain posted for 30 days after the end of the Restricted Entry Interval (REI). After this time, the records must be maintained for **2 years**. All other information (items 9-11) must be recorded within 14 days of application. If a tank mix of pesticides is applied with different REIs, write down the longest REI. **Note**: WPS agricultural-use pesticides may be general-use or restricted-use pesticides.

*Multiply the rate of application that you used by Size of Area Treated (item 9) to get Total Amount Applied (item 10). The Total Amount Applied is not the quantity after water or a carrier is added.

Note: For applications made to less than 1/10-acre, indicate "spot treatment" within Crop or Commodity Treated (item 5) and record the Location of Treated Area (item 1). Record the Date, Brand Name, EPA Reg. No., and Total Amount Applied (items 2, 6, 7, and 10).
